# Meet CHARGESPOT

Revolutionizing Mobile Charging, Anytime, Anywhere

# Need power on the go? CHARGESPOT has you covered globally.

Since its Hong Kong launch in 2017, CHARGESPOT has become the undisputed leader in the Asian power bank rental market. Our rapid expansion into Japan and beyond solidifies our position as the **world's first and largest transnational power bank rental company**.

# Our Journey in Hong Kong

## From Launch to Market Leader

- 2017**  
Founded as Hong Kong's pioneering power bank rental service.
- 2019**  
First launched our service in 7-Eleven, now expanding to more than 1000 locations citywide.
- 2022**  
Became a wholly owned subsidiary under INFORICH, which successfully listed on the Tokyo Stock Exchange.
- 2023**  
Established strategic partnership with Hong Kong Disneyland Resort, owning 17 rental stations in total.
- 2025**  
Became the official power bank rental service provider in Kai Tak Sports Park, supporting massive events up to 50,000 foot traffic.

# Our Mission: Unlocking the Power of CHARGE SPOT

## Powering Possibilities

- **Effortless Charging**  
We empower consumers with seamless access to power.
- **Exponential Growth**  
We power up businesses with a simple, reliable solution to boost offline traffic and drive revenue.
- **Creating Unique Moments**  
Our expansive network delivers unparalleled convenience, creating unique opportunities for partners to connect with their customers.

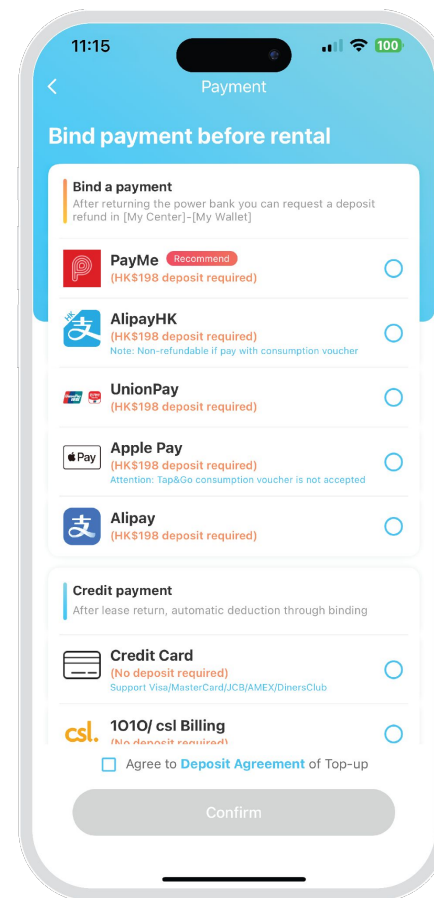

# A Growing International User Base

Embracing the Local, Connecting the Global

## Global Social Platforms

Actively posting, reaching and engaging with different audience.

## Various Payment Methods

Our multiple payment gateways facilitate seamless transactions, expanding your business's global footprint.

# ESG COMMITMENT

# Reduction of CO2 Emissions Through CHARGESPOT

We help to reduce CO2 emissions by recharging and reusing power banks more than a certain number of times to eliminate wasted batteries. By using CHARGESPOT, you can reduce CO2 emissions by 42% compared to purchasing a power bank.

\*Assuming 1.63 power banks per person

- Reduction of ca. 0.0010kg (CO2) per rental
- Reduction of 196,774kg (CO2) per year
- Equivalent to forests size of 31 soccer fields

(For 1,040,000 monthly users)  
(Estimation provided by Asuene Inc.)

## Promotion of Sharing Services

By sharing things e.g. places, skills and time, sharing services can improve the efficiency of resources, utilize and contribute to a sustainable recycling-oriented society. Through CHARGESPOT, we make the service seamless and establish a “sharing culture”.

## Implementation of Recycling Procedures of End-of-Life Power Banks

In CHARGESPOT, we request companies licensed by municipalities for industrial waste disposal and special management of industrial waste disposal to carry out safe and appropriate handling of old batteries.
